Hyderabad, Telangana, 500055, India

CAREER OBJECTIVE

Full Stack Developer skilled in MERN stack and Spring Boot, with a deep understanding of web development principles. Passionate about creating high-performance applications and writing maintainable code. Committed to continuous learning and delivering innovative solutions.

SKILLS

- ❖ **Programming Languages:** Java, JavaScript, C
- ❖ **Web Technologies:** HTML, CSS, Bootstrap, Tailwind CSS, NodeJS
- ❖ **Frameworks & Libraries:** ReactJS, Spring Boot, ExpressJS
- ❖ **Databases:** MySQL, MongoDB
- ❖ **Version Control:** Git, GitHub

EDUCATION

- | | |
|---|-------------------------|
| ❖ B. Tech in Computer Science KL University 2021 - 2025 | CGPA: 8.95 |
| ❖ XII Narayana Junior College 2019 – 2021 | Percentage: 91.4 |
| ❖ X Bhashyam High School 2018 – 2019 | CGPA: 8.2 |

EXPERIENCE

HACKATHON

- ❖ Successfully participated in three hackathons, including two academic hackathons utilizing the MERN stack and Spring Boot, showcasing problem-solving and full-stack development skills.
- ❖ Represented at the national level in the Smart India Hackathon (SIH), demonstrating innovative thinking and real-world problem-solving under time constraints.
- ❖ Worked in cross-functional teams to design, develop, and deploy solutions, emphasizing collaboration, creativity, and technical expertise.

PROJECTS

Spotify Clone | MERN STACK NOV - 2024

- ❖ Built a Spotify clone web app with features like user authentication, playlist management, and music streaming. Designed a responsive, intuitive UI and implemented efficient back-end integration to handle user data and media, highlighting skills in full-stack development and modern UI design.

Hotelio – Hotel Management | SPRING BOOT NOV - 2023

- ❖ Developed a hotel booking application with robust functionalities and an intuitive booking process, streamlining hotel management and enhancing user experience through efficient design and performance.

FlyAway – Ticket booking system | MERN STACK MAY - 2023

- ❖ Developed a full-stack travel booking platform with JWT authentication, RESTful APIs, and MongoDB for seamless trip management. Deployed on Netlify (frontend) & Render (backend) for real-world accessibility.
